

# HOW RX4 GROUP CAN HELP A HEALTHCARE BOARD, CHAIR, MEMBER OR TRUSTEE

**M**any healthcare provider organizations have a formal board or advisory governance group of members/trustees (and where they don't RX4 can certainly help to set one up that will add considerable value). However in this fast-changing healthcare environment, board and trustee chairs and members need to be appropriately selected, operate cohesively as a team and have up-to-date knowledge on what they should be discussing in order to ensure that the organizational mission is on track and the major inherent risks are being properly managed.

In recent times, the RX4 Group and its sister companies in The Adaptive Healthcare Network have solved issues and challenges in this area such as the following:

- A large surgery center group board chair or deputy needs to have the knowledge, skill and system to provide a new governance and controls system and ethics policy.
- A skilled nursing facility board need to appoint a new member who can help guide the introduction of an interactive technology platform to assist in detecting care gaps, manage costs, anticipate and measure consumer needs and expectations and better manage chronic illness and end-of-life care.
- A community hospital board wants to hold a one-day retreat to discuss how to best monitor patient dispute and complaint processes (and how to best respond to them).
- There are no tangible governance priorities, goals or job descriptions or guidelines for any trustee members of a small private hospital.
- The Board of a group of senior care homes wants to better understand their market segments in order to create better occupancy levels in the future.
